Hair Depilation (Including laser therapy and electrolysis)

General Principles

Funding approval will only be given in line with these general principles. Where patients are unable to meet these principles in addition to the specific treatment criteria set out in this policy, funding approval will not be given.

1. The CCG does not commission surgery for cosmetic purposes alone.
2. Funding approval must be secured by primary care prior to referring patients seeking corrective surgery.
3. Referring patients to secondary care without funding approval having been secured not only incurs significant costs in out-patient appointments for patients that may not qualify for surgery, but inappropriately raises the patient's expectation of treatment.
4. On limited occasions, the CCG may approve funding for an assessment only in order to confirm or obtain evidence demonstrating whether a patient meets the criteria for funding. In such cases, patients should be made aware that the assessment does not mean that they will be provided with surgery and surgery will only be provided where it can be demonstrated that the patients meets the criteria to access treatment in this policy.
5. Funding approval will only be given where there is evidence that the treatment requested is effective and the patient has the potential to benefit from the proposed treatment. Where it is demonstrated that patients have previously been provided with the treatment with limited or diminishing benefit, funding approval is unlikely to be agreed.
6. Patients should be advised that receiving funding approval does not confirm that they will receive treatment or surgery for a condition as a consent discussion will need to be undertaken with a clinician prior to treatment.
7. The policy does not apply to patients with suspected malignancy who should continue to be referred under 2 week wait pathway rules for assessment and testing as appropriate.
8. Patients with an elevated BMI of 30 or more are likely to receive fewer benefits from surgery and should be encouraged to lose weight further prior to seeking surgery. In addition, the risks of surgery are significantly increased. (Thelwall, 2015)
9. Patients who are smokers should be referred to smoking cessation services in order to reduce the risk of surgery and improve healing. (Loof S., 2014)

10. Where funding approval is given by the Individual Funding Panel, it will be available for a specified period of time, normally one year.

Background

Hirsutism

Hirsutism can't be cured, but there are treatments to help control the condition. There are a number of things you can do yourself that may help. If you are overweight, losing weight can reduce the production of androgens.

Patients concerned with the appearance of their body and facial hair should be advised about managing their condition through conservative methods including shaving, waxing, and depilatory creams although such treatments are also not routinely commissioned or funded by Somerset CCG.

POLICY – CRITERIA TO ACCESS TREATMENT - IFR

1. Hair depilation is not routinely commissioned

2. Consideration may be given under the following criteria are met:

- a) Following reconstructive surgery leading to abnormally located hair-bearing skin
- b) The patient is undergoing treatment for pilonidal sinus, to reduce recurrence
- c) Patients who have an underlying congenital and/or endocrine abnormality resulting in exceptionally excessive hair (for example, patients with polycystic ovary syndrome) may be considered

AND

- d) There must be reason to believe that treatment will lead to improvement in health status
- e) All applications must be accompanied by an opinion from a secondary Care Consultant (that is, a dermatologist or endocrinologist)
- f) Photographic supporting evidence must be sent with the application form.
- g) Only for face and neck
- h) Where funding has been authorised it will be for a fixed number of sessions only up to a maximum of 8
- i) Top up treatments/sessions are not routinely funded

AND

In order for funding to be agreed there must be some unusual or unique clinical factor about the patient that suggests that they are exceptional as defined below:

- Significantly different to the general population of patients with the condition in question
- Likely to gain significantly more benefit from the intervention than might be expected from the average patient with the condition

Individual cases will be reviewed at the Commissioner's Individual Funding Panel upon receipt of a completed application form from the patient's GP, Consultant or Clinician.

Applications cannot be considered from patients personally.

Provided these patients receive the full support of their general practitioner, or clinician, in pursuing their funding request an application may be made to the Individual Funding Request Panel for consideration.

In order for funding to be agreed there must be some unusual or unique clinical factor about the patient that suggests that they are exceptional as defined below:

- Significantly different to the general population of patients with the condition in question.
- Likely to gain significantly more benefit from the intervention than might be expected from the average patient with the condition.

It is expected that clinicians will have ensured that the patient, on behalf of who they are forwarding the application for, is appropriately informed about the existing policies prior to an application to the IFRP. This will reassure the Panel that the patient has a reasonable expectation of the outcome of the application and its context.

If you would like further copies of this policy or need it in another format, such as Braille or another language, please contact the Patient Advice and Liaison Service on Telephone number: 08000 851067.
